

# RP-52 Bloom Protector

Effective protection for affected areas of white salt treatment.

## Functions:

Waterproof product for protection from water-based stains like wine & soft drinks etc. To avoid efflorescence (salt) in flooring materials and facades of medium to high porosity such as terracotta, brick, concrete & unpolished porous natural stone etc. It can be applied both indoors and outdoors.

## Advantage:

- Prevents salts.
- Does not change original appearance.

## Features:

- Solvent based waterproofing
  - **Ph:** Not applicable
  - **Density:** 1,044 Kg/L
  - **Performance:** About 2 - 20 m<sup>2</sup> / L depending on the material to be treated.
- NOTE: Performances are merely indicative. Actual results may vary

## Precautions:

- Before application, surface should be clean, dry and totally free of moisture. In cases of newly placed tiles which generate salt in the curing process, you must wait until the end of this process before applying the product.
- -Do not apply using a sprayer as harmful vapours could be generated.
- - Always follow the recommended application times
- -Always wear the appropriate protective work wear (gloves, goggles etc.)
- -Use product in a well ventilated area
- -Keep out of the reach of children
- -Do not drink this product
- 
- ALWAYS CARRY OUT A TEST ON A SMALL HIDDEN AREA BEFORE FULL APPLICATION!
- 

## Instructions:

1. Surface should be clean and dry. Pour the product in a clean tray.
2. Using a roller or brush, soak in the product
3. Depending on the porosity of the material, apply a thick layer or several thin layers until almost at saturation of the surface
4. Although the product dries within a few hours, you should wait 24 hours before walking on the surface to ensure maximum protection
